PAINT U

THE TRADERS FIRE RESISTING PAINTS

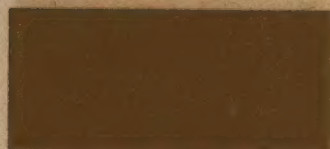

DIRECTIONS.

Do not paint in damp or frosty weather.
Stir the paint thoroughly.
Have the surface DRY and free from grease and dirt.
Shellac knots and pitchy places, Putty seams and nail holes.
Allow ample time for each coat to dry.
If thinning is required, use Pure Raw Linseed Oil for outside
work. For inside work use Turpentine only.
Rub out well under the brush.

Traders Paint & Roofing Co.

TDCAT 1900 PANORAMA.

THE TRADERS PAINTS

are made of the highest grade
of material throughout.

They are unequalled for Brushing, Covering Body,
Durability, Finish and Strength of Color.

One gallon when properly applied upon a good
surface, will cover 300 square feet two coats.

It will not chalk, crack flake or peel off.

These colors can be reduced to any desired tint
by the addition of our White Paint or shaded with
our Black Paint, or some of the Dark Greens,
Browns, etc.

TO ASCERTAIN THE QUANTITY REQUIRED TO PAINT A GIVEN SURFACE

Add the Length, in feet, of the Sides and Ends
of the building, and multiply by the average Height.
Divide the product by 300, and the result will show
the number of gallons ordinarily required of
TRADERS PAINT to cover two coats where surface
is in good condition.
